Photo : Not so bad...

Volunteer assistant Katie Gildow, left, comforts Elizabeth Stevenson, 6, of Bellefontaine, as she braves a flu shot administered Saturday at Riverside High School by Virginia White of the Logan County Health District. Health officials said about 650 injections were administered during the two-hour clinic. Logan County Health Commissioner Dr. Boyd Hoddinott said there is no shortage of the influenza vaccine which also can help guard against invasive infections, such as the MRSA staph infection.
